January 2017 Release Notes

Published on 02/06/2017

New Features

inMotion

- Submitters can now finalize requests instantaneously (*optional*)
- Submitters that also manage their respective forms can now create a project directly at the form level
- Admins now have the ability to only allow project creation from an associated request
- Projects can now be auto-archived
- Job Launch forms can now be duplicated directly by an account administrator
- Job Launch attachments can now be released with the associated Job Launch (Review + Approval only)

Review + Approval

- Measure Tool is now available for measuring asset properties by pixels, inches, and centimeters
- If enabled by the Proof Owner, reviewers can download the files used to create the proof
- If enabled by the Proof Owner, reviewers can print proof approvals and related conversations to PDF
- Comments and annotations now animate into the collaboration panel and canvas, enabling true real-time collaboration without refreshing the page

Improvements

inMotion

- Separated Custom Fields into its own view under Account Settings > Customize

- Reports can now be set to display all results on a single page

- Job Launch Save & Exit option has had its icon changed from green to yellow

- Job Launch Save & Exit will now prompt a modal informing the requester that they are only saving and not submitting

- Added filter to desired Project Filter Group field in the Job Launch Workspace

- Now include desired Project Filter Group in email to Job Launch Manager

- ASCII characters can now be used in Job Launch forms

- Proof Deadlines can no longer be set for past dates

- Project Lifecycle Information report now always includes all projects created from Job Launch forms

- Project Lifecycle report has a new field: *Project Members*
